how to clean the kitchen sink

homemaking

step 1 - every use

After every use quickly wipe with a damp cloth with washing up liquid on it and then rinse

step 2 - every day

- Clear everything from the sink
- Squirt a little washing up liquid into the sink and onto the draining board.
- Wipe the sink, draining board and taps.
- Any stubborn marks - sprinkle with baking soda and rub gently.
- Use an old toothbrush to scrub around base of taps and plug holes.
- Rinse thoroughly.
- Wipe and polish dry with a clean soft cloth.
- Pour boiling water down the plug hole to rinse away any gunk.

step 3 - every week

- Tip a cup of soda crystals down the plug hole
- Pour down a cup of white vinegar and allowed to fizz for 10-15 minutes.
- Rinse clear with boiling water.

after raw chicken, meat or fish and if it's very dirty

Always wipe down sink and surfaces with antibacterial surface cleaner and wash hands thoroughly to avoid spreading germs.
